

CA-NETWORK-ASSIGNMENT

Real world application of Parallel computing: weather forecasting systems

Parallel : Weather forecasting systems.

Parallel Computing Use:

- Speed up image reconstruction and analysis by processing multiple image slices simultaneously.
- Uses multiple processors / cores for faster diagnosis

Network System Use:

- Connect diagnostic machines with hospital server and doctor.
- Enables real-time sharing of reports images and remote consultations.

Importance

- Ensures quick, accurate and life-saving diagnosis
- Provides faster access to patient data and AI based analysis.
